

..... how can we learn  
without a memory?

*Uniquely* in the humanitarian sector, the Library supports:

-  **Real-time user-upload** – share your knowledge, live (crowd-sourcing)
-  **Community moderation** – search rankings by popularity (...with an abuse button)
-  **User-generated collections** – create ‘channels’ for specific responses, trainings...
-  **Related content** – suggests alternative documents, based on what you view
-  **All sectors and cross-cutting issues** – on the same library
-  **All humanitarian stakeholders** – governments, civil society and development actors
-  **Links to each publishing agency** – helping map the humanitarian space

## New for the Humanitarian Library in 2017:

**UN/OCHA Humanitarian ID login** – shared with ReliefWeb, HumanitarianResponse...

**Super-channels** – collections of channels for complex topics, user-generated

**Camp planning super-channel** – supporting the UNOPS Manual, chapter-by-chapter

**Shelter Meeting content** – migrating hundreds of presentations from over a decade

**Sector links** – to other useful libraries, resources, trainings, organisations...

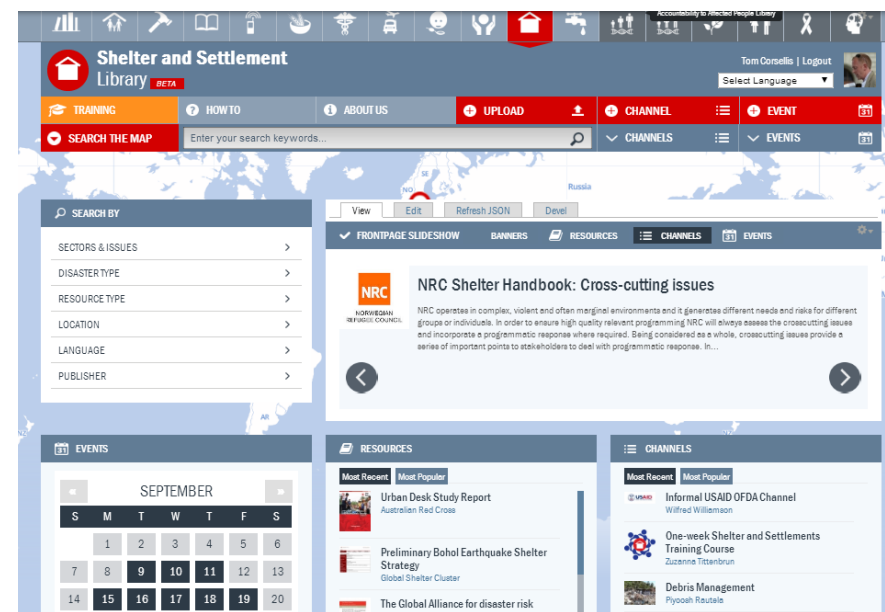

**More visible data** – where is your guideline being used?

**Launch from Beta** – interface re-design, bugs fixed, much faster!

your last views  
of the old Library .....

# Humanitarian Library update

shelter centre

connecting and supporting the humanitarian shelter community responding to settlement and reconstruction needs after conflicts and disasters

## HELP

Users are encouraged to like and promote content (promoting content requires a trusted account, which can be requested from your profile page) in order to give an indication of the document's quality to other users. A low popularity rating indicates a resource's low relevance. The content shall nonetheless remain in the library, since some useful but irrelevant enough to upload. For content which is entirely inappropriate or offensive, users are encouraged to report the offending resource. A site administrator will then verify if it should be removed from the library.
