

APPROPRIATE AND EFFECTIVE SUPPORT FOR SELF-RECOVERY

Promoting Safer Building

Name,
Job title, Organisation
Email:

#SaferSelfRecovery

**British
Geological Survey**
NATURAL ENVIRONMENT RESEARCH COUNCIL

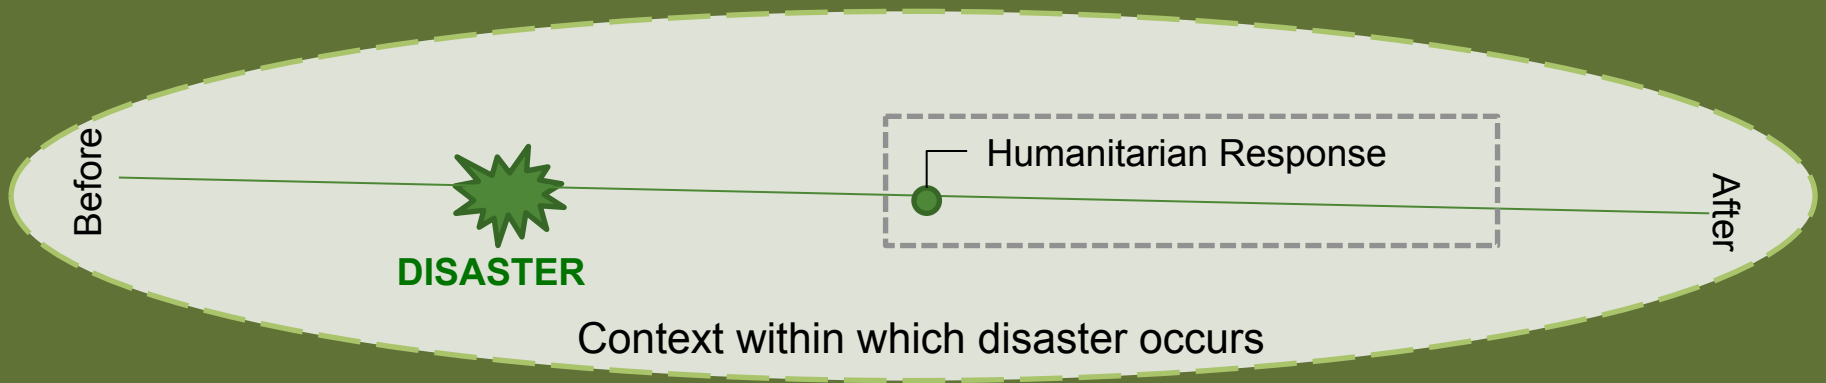

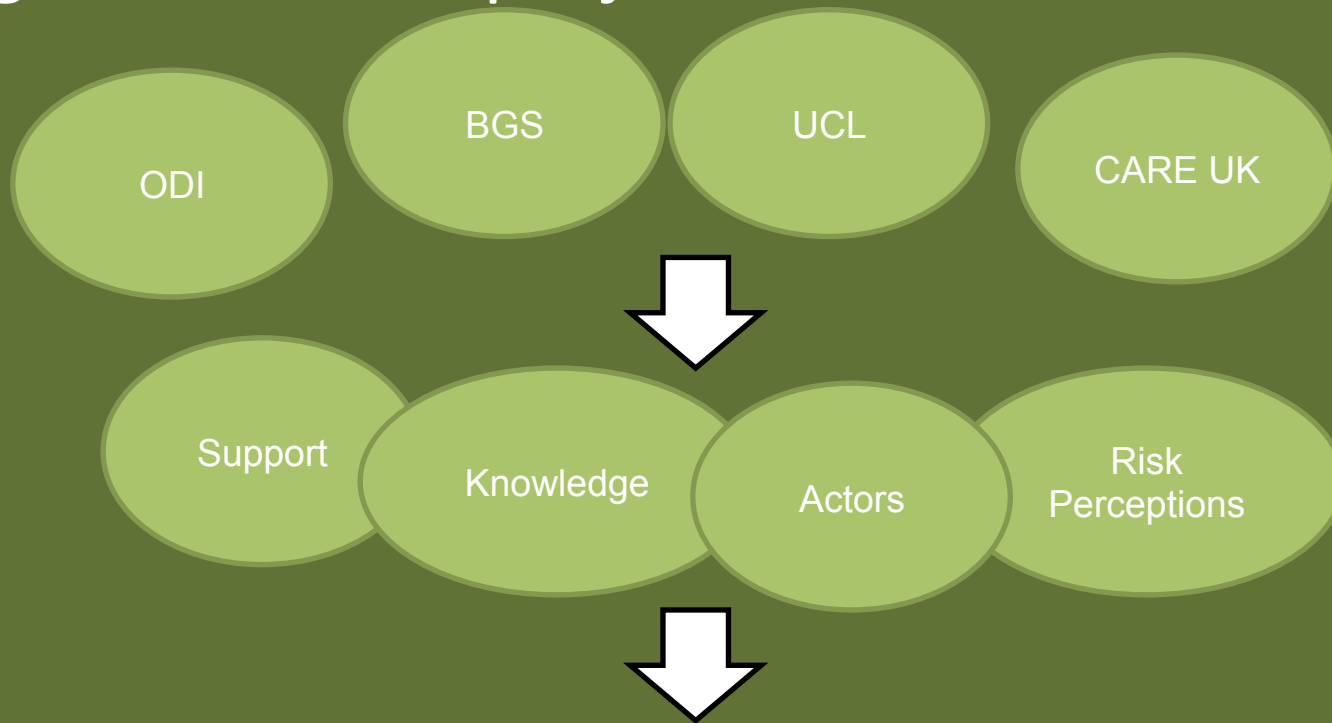

(Self-) Recovery

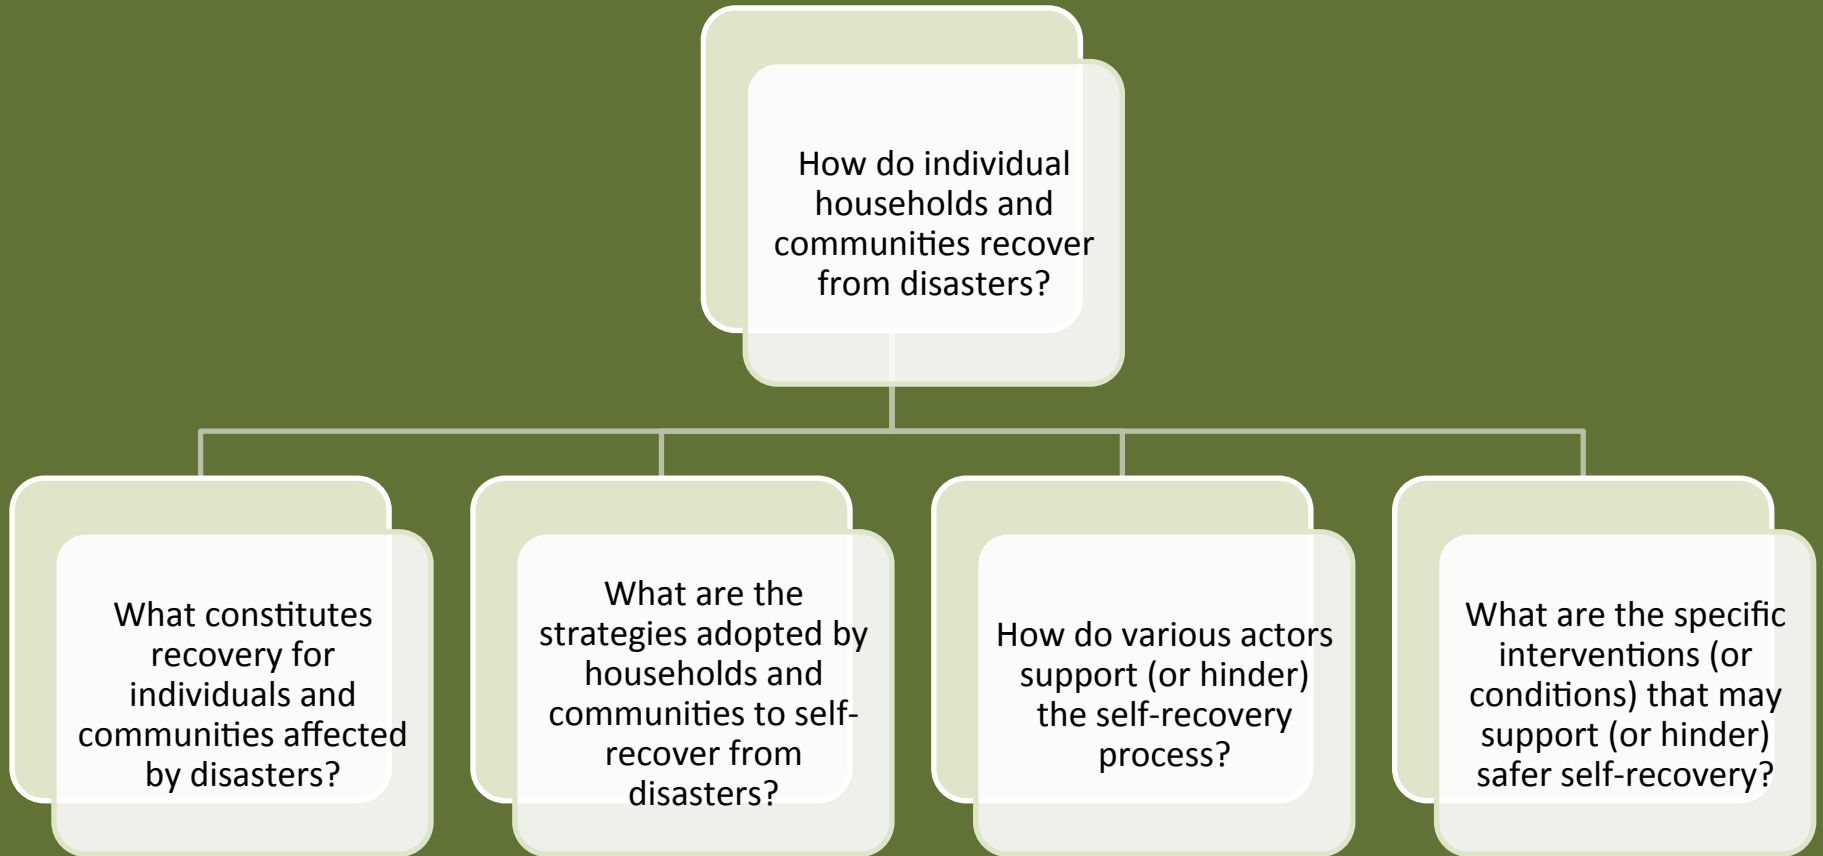

The Build Back Safer (BBS) principles are founded on the idea that “**Governments, donors and aid agencies must recognize that families and communities drive their own recovery**” (Build Back Better principles, 2005)

Background to the project

Research Questions

A multidisciplinary methodology

Workshops

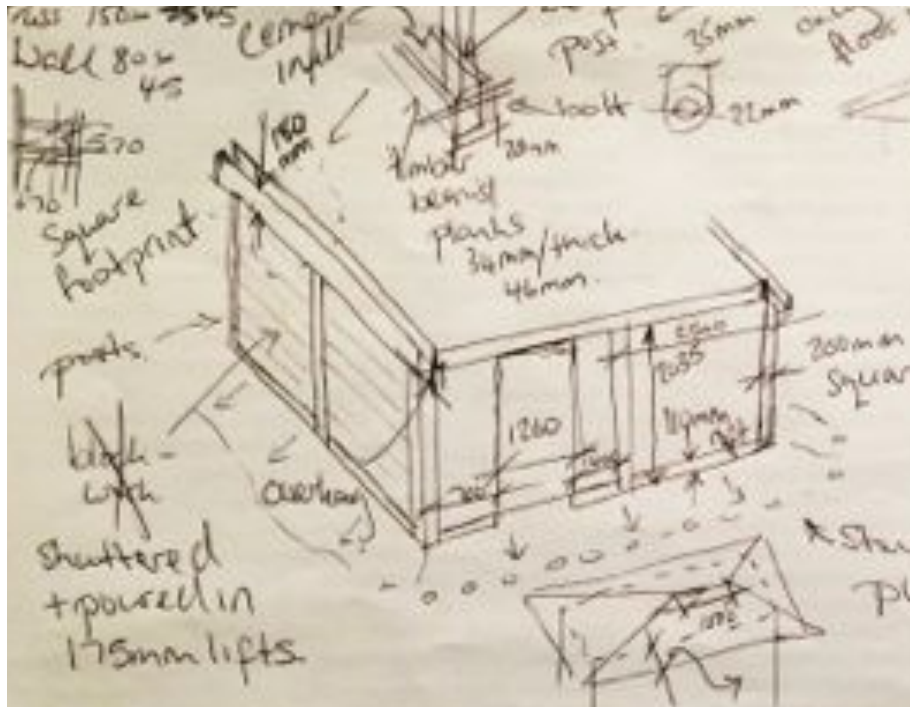

Desk-based Research

Field Research

- Transect Walks
- Building Survey Forms
- Focus Group Discussions
- Timeline Mapping
- Conceptualising recovery
- Interviews

Philippines

Transect Walks 13

Building Survey Forms 36

Focus Group Discussions 22

Timeline Mapping 16

Conceptualising recovery 11

Interviews 18

Observations and visual documentation

Nepal

Transect Walks	13
Building Survey Forms	9
Focus Group Discussions	12
Timeline Mapping	7
Conceptualising recovery	9
Interviews	18

Observations and visual documentation

Reviewing the research questions

Q1. What constitutes recovery for individuals and communities affected by disasters?

- > Psychosocial
- > Process
- > Shelter/home
- > Infrastructure
- > Livelihood
- > Opportunity
- > Information
- > Unattainable

Q2. What are the strategies adopted by households and communities to self-recover from disasters?

Sharing labour, Budhathum, Nepal

- › Basic survival/coping
- › Belief systems
- › Adaptation
- › Family support
- › Planning
- › Community organisation
- › Preparedness
- › Movement

Q3. How do various actors shape the self-recovery process?

- › Community and community leaders
- › Local municipal and regional leaders
- › National governments
- › INGOs and NGOs
- › Family (& Overseas Workers)
- › National and regional NGOs
- › Private sector

Q4. What are the specific interventions (or conditions) that may support (or hinder) safer self-recovery disasters?

Building back, Boseri, Nepal

- Knowledge building and exchange
- Type of intervention/assistance
- Deeper analysis of people's priorities
- Existence of communal interests
- Access to secure evacuation spaces
- Cash economy
- Information and awareness
- Control

Summary and next steps

Q1. What constitutes recovery for individuals and communities affected by disasters?

Q2. What are the strategies adopted by households and communities to self-recover from disasters?

Q3. How do various actors support (or hinder) the self-recovery process?

Q4. What are the specific interventions (or conditions) that may support (or hinder) safer self-recovery?

Thank you!
