

Harmonization of construction contracts

Francois Baillon - IHIP

UK SHELTER FORUM 27
23rd April 2021

“The values of agreeing a short contract format for construction with the Shelter and WASH sectors”

François Baillon / IHIP managing director

IHIP: International Humanitarian Infrastructure Platform

www.ihip.earth

 Schweizerische Eidgenossenschaft
Confédération suisse
Confederazione Svizzera
Confederaziun svizra

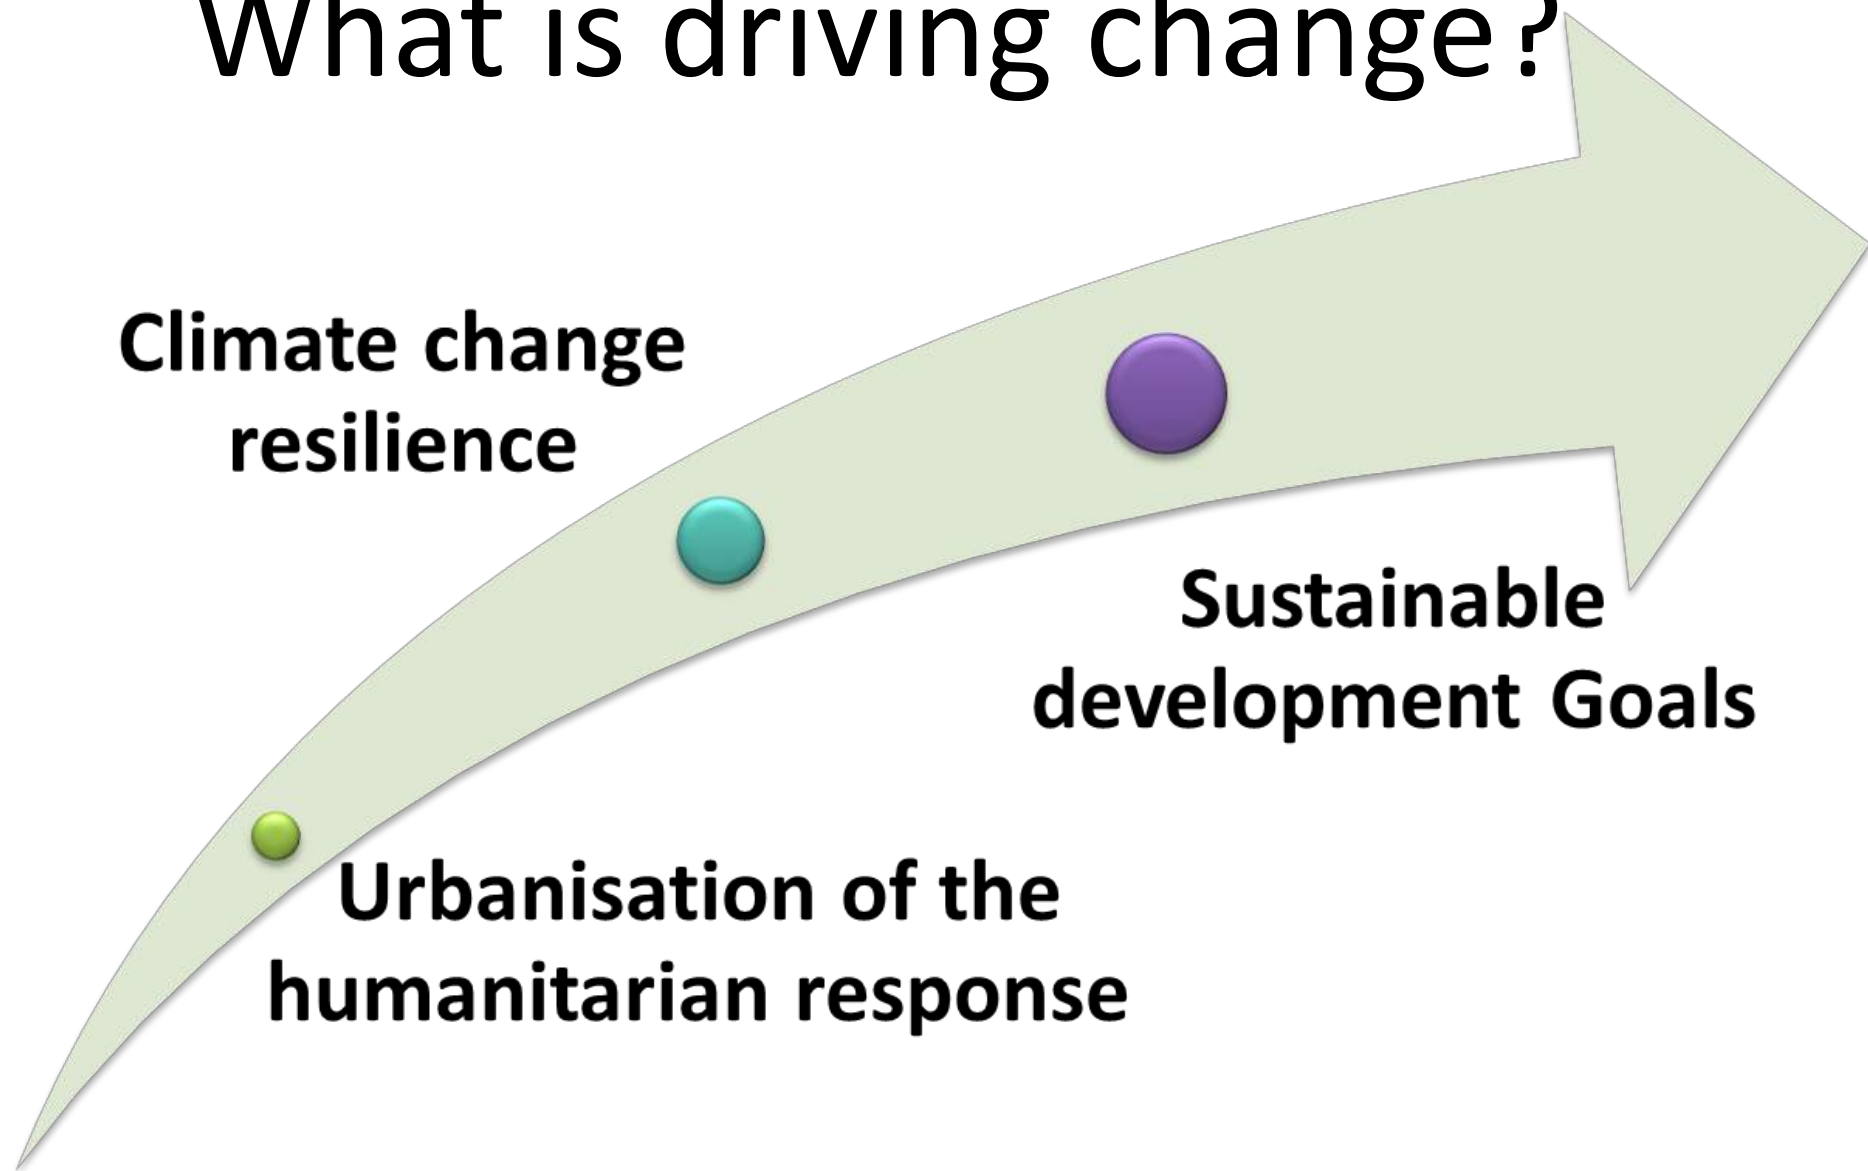

Swiss Agency for Development
and Cooperation SDC

IHIP is addressing the need of humanitarian organizations to **engage with the private sector in larger and complex infrastructure project.**

The primary focus is to harmonize private sector approaches to be applied in those countries subject to fragility, conflict and violence, mainly through **forms of contract for construction.**

What is driving change?

De risking settlement construction works

- ✓ **New actors, the local private sector, engineering and contractors, have to be included in the life cycle of such projects**
- ✓ **New risks: knowledge gap for NGO/Humanitarian Actors to engage with the private sector on complex infrastructure**

Partnership Goals

Common agenda shared between international donors / Humanitarian actors / Private sector association:

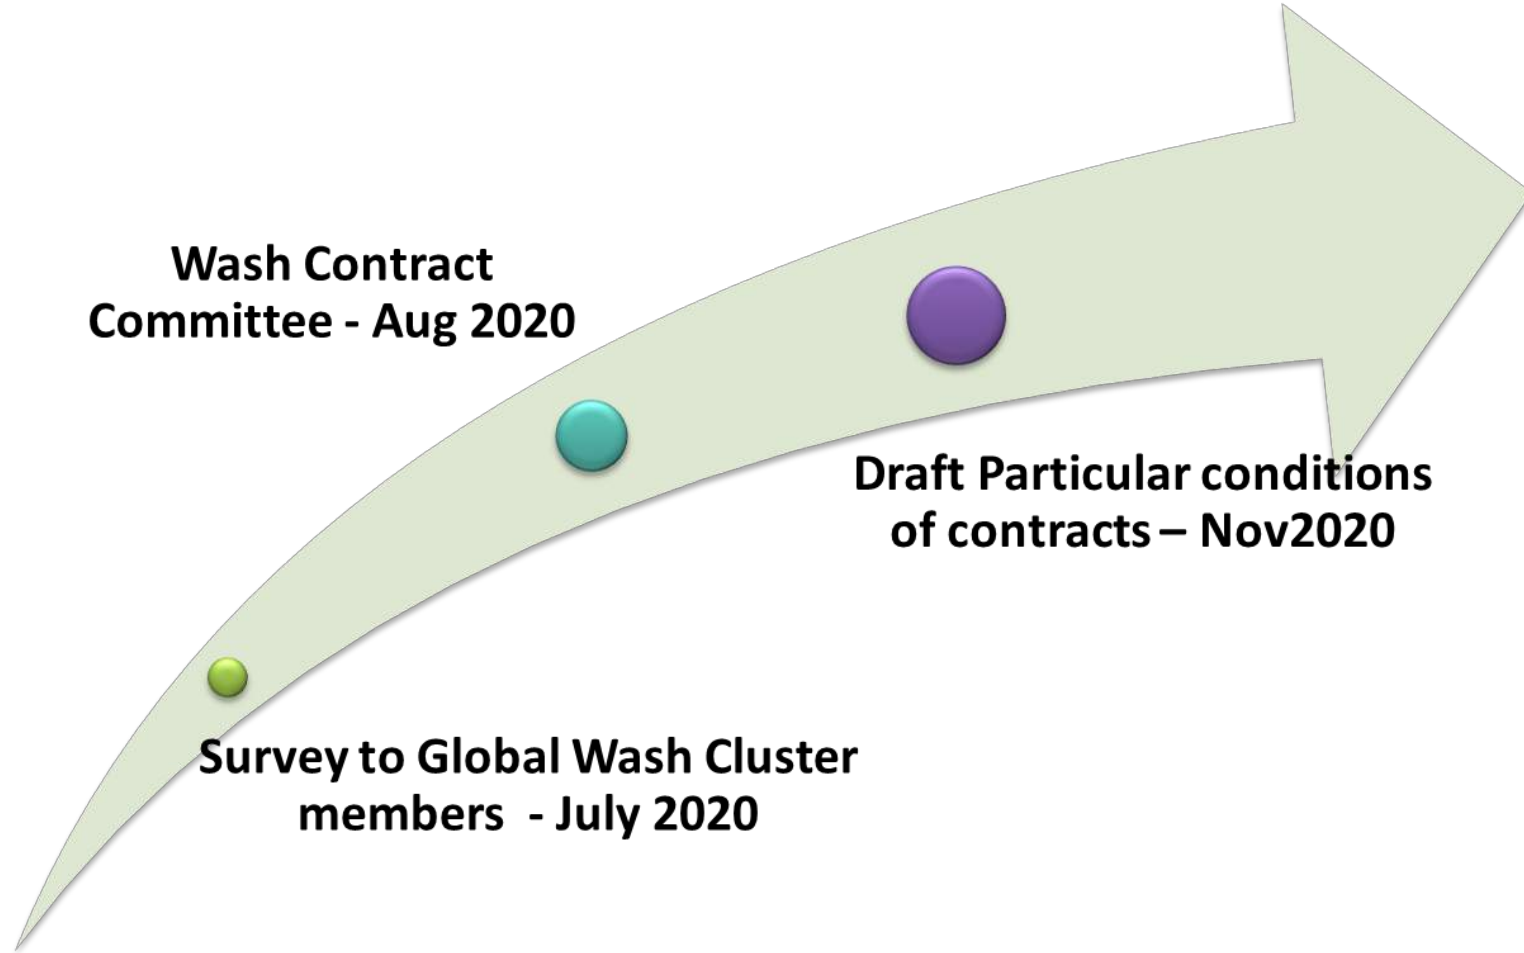

The IHIP proposal:

- ✓ De-risking with the harmonized humanitarian construction contract
- ✓ Done with the Global WASH Clusters
- ✓ In progress with the Global SHELTER Cluster
- ✓ Added the Settlement construction works
- ✓ Based on FIDIC short form of contract

Past Cycle1: for the Wash sector
