R4R

1. Environment

- Quantifying the **environmental footprint**
- Adopting an **environmental health lens**
- Designing for a **pandemic response**

2. Concerned Groups

- Strengthening **women's tenure security**
- Addressing the **Exclusion of LGBTIQ+**
- Including **persons with disabilities**
- Promoting **children's participation**

3. Conflicts + Local Practices

- Incorporating **local building practices**
- Promoting **self-help in conflict contexts**
- Defining **S&S in conflict and peacebuilding**

4. Livelihoods

- Exploring the role of **livelihoods** in shelter
- Recovering and **promoting home-based enterprises**

5. Disaster Risks

- Integrating **Geoscience and community hazards**
- Addressing disaster **risk in informal settlements**
- Rethinking spaces through **design**

6. Protection and Participation

- Defining **protection in self-recovery**
- Participation in **decision-making**
- Defining "**a good house**": Touching on the intangible

Chapter 2: Dwyer et. al.

Addressing diversity of gender and sexuality

Explores

- exclusion, violence, and discrimination of diverse SOGIESC (LGBTQ+)
- very little research and guidance on this topic

Seeks to investigate:

- the impact of pre-emergency marginalization
- the consequences of existing S&S policy/practice
- how to strengthen and support effective responses

Chapter 3: Rigon et. al

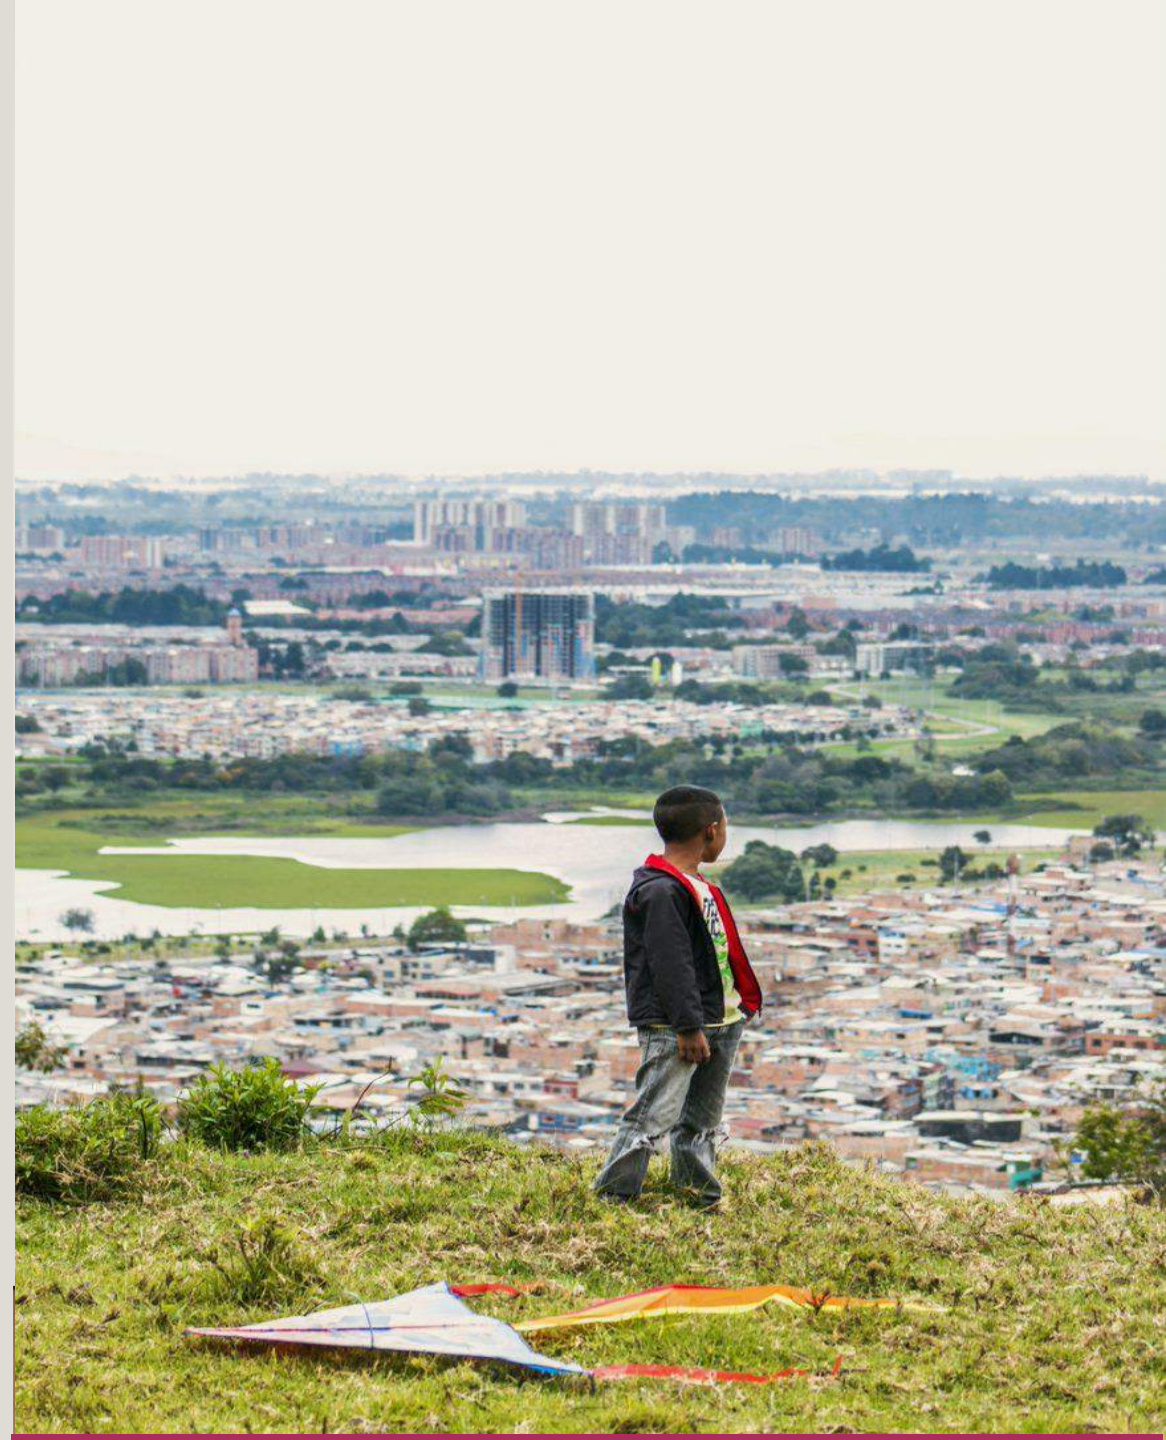

Promoting children's participation in design

Investigates:

- children's participation in co-design of built interventions

Seeks to investigate:

- the impact co-designing can have on children's well-being

Chapter 4: Aranki et. al

Exploring women's tenure security

Presented by:
Kirstie Farmer

R4R Chapter - Women's Tenure Security

Aranki D, Cunial L, Dewast C, Farmer K, Hartman A, Petersohn N

Gap:

Increased VAW in conflict/post
conflict- risk for women INTRA HH
Shelter delivered to male HH
Do No Harm

Women's tenure security:

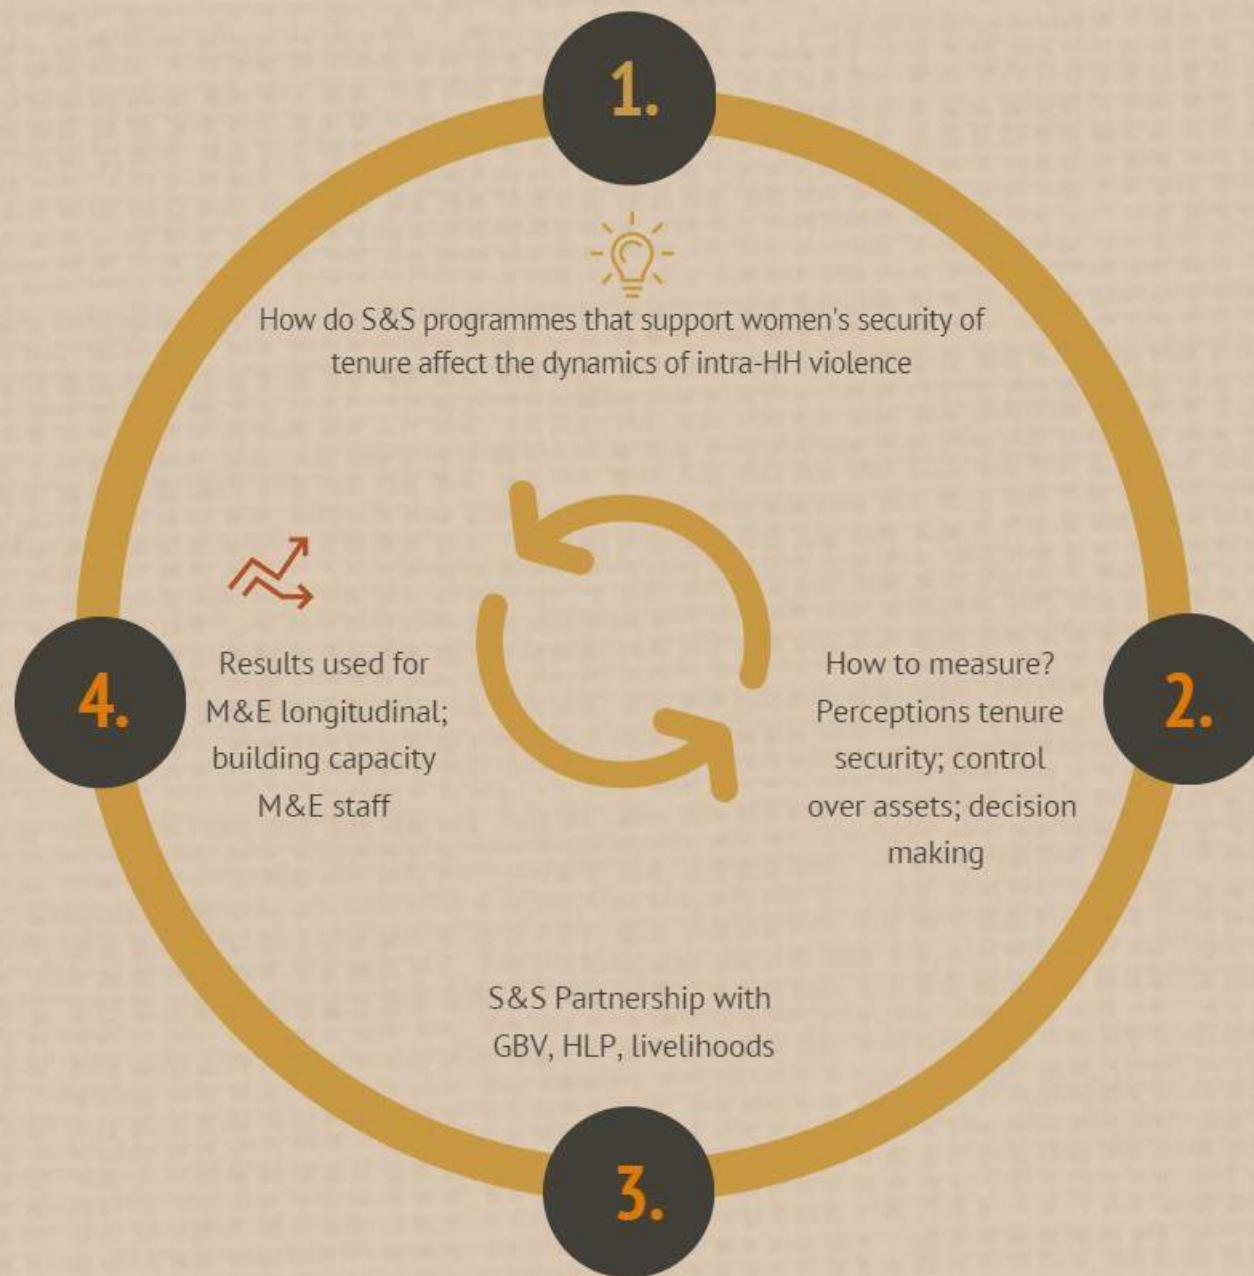

Right to adequate housing
Sphere Standards - Shelter
S&S Programmes e.g. tenure in joint
names

Research Question:

Causality between increased tenure
security for women and protection
against, or increased risk of violence
within households

Use of research:

Longitudinal M&E - accountability
Building capacity of S&S staff to
strengthen VAW considerations in
programmes
Contribute to understanding of VAW
in humanitarian crises

Chapter 4: Marshall et. al

Including persons with disabilities in recovery

Presented by:
Alex Robinson
Univ. of Melbourne

CHAPTER 4

Including persons with disabilities in recovery

Leeanne Marshall
Australian Red Cross

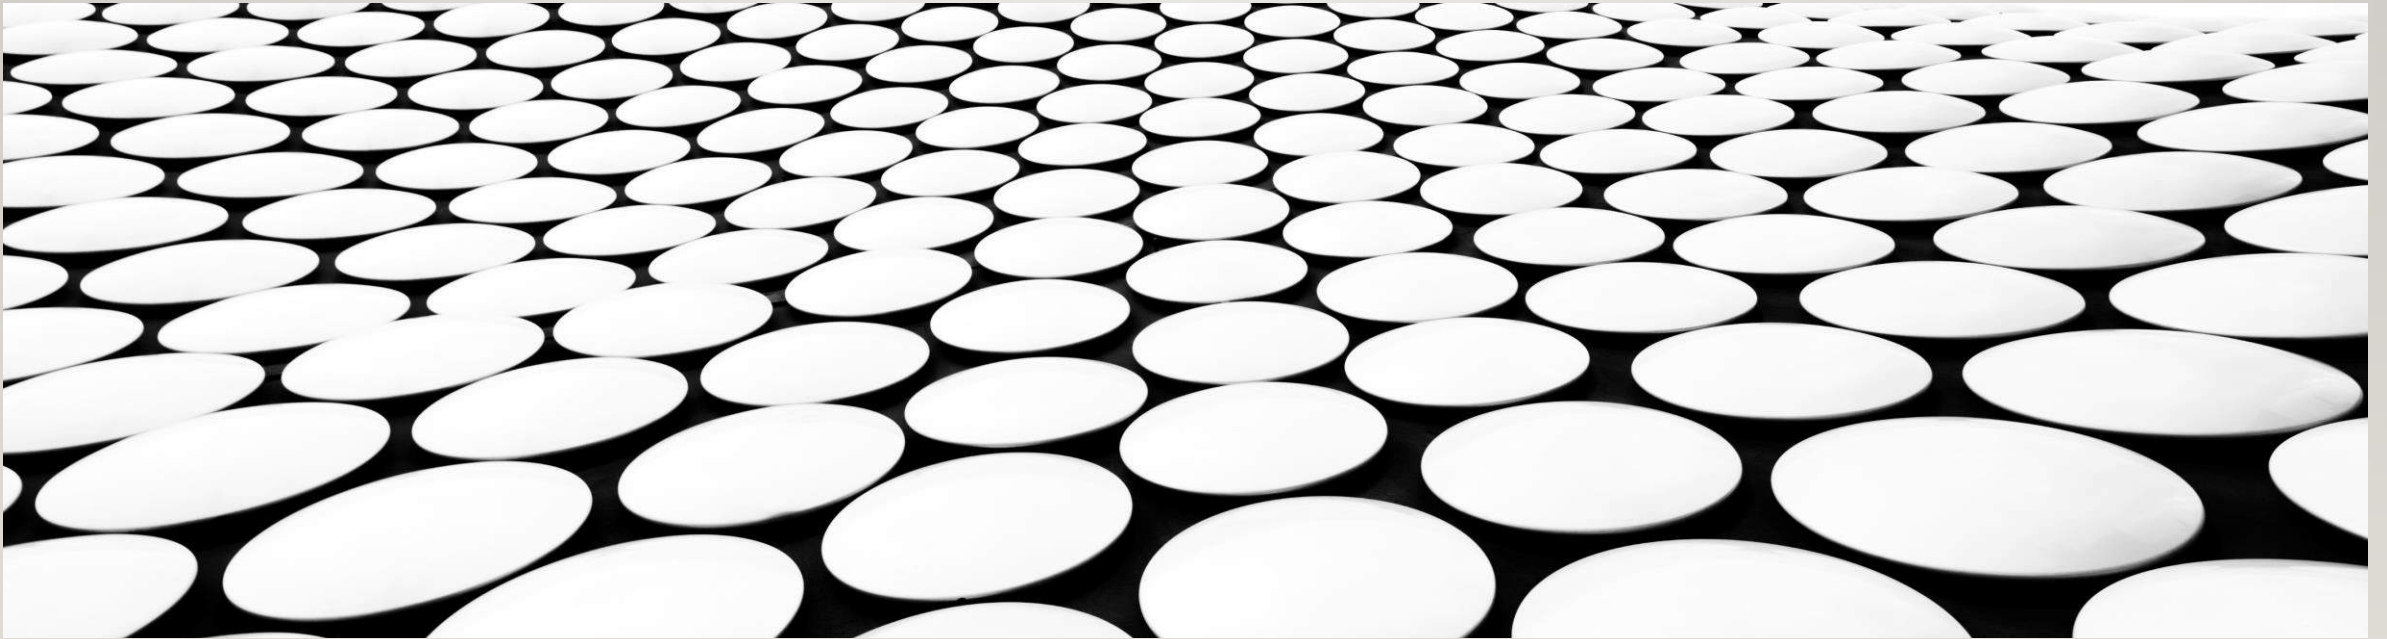

Alex Robinson
Nossal Institute,
University of Melbourne

Victoria Maynard
University College London

George Khuri
National Association for
the Rights of Disabled
People, Lebanon

Including Persons With Disabilities

Leeanne Marshall, Australian Red Cross; Alex Robinson, Nossal Institute, University Of Melbourne; Victoria Maynard, University College London; George Khuri, National Association For The Rights Of Disabled People, Lebanon

The State of Play

- 15% world's population
- Disproportionately impacted
- CRPD Art 11 Situations of Risk
- Sendai Framework, 2015
- Humanitarian Disability Charter, 2016
- Humanitarian Inclusion Standards, 2018
- IASC disability guidelines, 2019

- Awareness still not translating into action
- Limited actions not clearly resulting in improved inclusion outcomes
- Limited participation of persons with disabilities
- Concerns that current guidance is not meeting sector specific needs

The Research (Lebanon and Indonesia)

- To what extent can a co-research process, that includes researchers with disabilities contribute to improving disability inclusion within organisations?
- To what extent can this process contribute to providing technical disability expertise to shelter practitioners?

Photo: Australian Red Cross / Noel Celis, 2014 (12 months after Typhoon Haiyan). Red Cross prioritised assistance to the most vulnerable, including older people and people with disability. Anita and Rojer received building materials and carpentry assistance to rebuild their home.

Lessons and questions:

42 institutions / 75 authors / ~50% women

Diverse range of topics - worth investigation

Less than 10% authors/contributors from LMIC institutions (<3% in abstracts)

Reconcile niche research topics with current humanitarian shelter coverage [e.g. Burkina Faso: 3-10% people receiving basic shelter assistance]

1.5 million children are facing nutrition crisis in Burkina Faso

News and Press Release • Source: Save the Children • Posted: 13 Apr 2021 • Originally published: 13 Apr 2021 • Origin: View original ↗

ONE-THIRD OF ALL CHILDREN UNDER FIVE IN THE COUNTRY ARE MALNOURISHED, WARNS SAVE THE CHILDREN

More than 1.5 million[1] children under five in Burkina Faso, over one-third[2] of all children in this age bracket, are facing a nutrition crisis, Save the Children warned today.

Currently, nearly 13 million[3] people are facing a lack of food in Burkina Faso, nearly half of them are children. Violence has displaced hundreds of thousands of people, worsening the plight of children. The eastern and central-northern regions of the country are among the worst affected, as 670,000[4] children had to flee their homes with their families.
